

Current GPHF-Minilab TLC Method Inventory
(November 2017)

No.	Active Pharmaceutical Ingredients, Co-Formulations, Dosage Forms
01	Acetylsalicylic acid single drug tablets and capsules
02	Albendazole single drug tablets and capsules
03	Amikacin single drug powders and solutions for injection
04	Aminophylline single drug tablets and capsules
05	Aminosalicyclic acid (PAS) single drug in modified release granules
05	Aminosalicylate sodium (PAS) single drug in modified release granules
06	Amlodipine besylate/mesylate single drug tablets and capsules
06	Amlodipine besylate/mesylate in co-formulated hydrochlorothiazide tablets and capsules
06	Amlodipine besylate/mesylate in co-formulated atenolol tablets and capsules
06	Amlodipine besylate/mesylate in co-formulated enalapril tablets and capsules
06	Amlodipine besylate/mesylate in co-formulated lisinopril tablets and capsules
06	Amlodipine besylate/mesylate in co-formulated perindopril tablets and capsules
07	Amodiaquine hydrochloride and free base in single drug tablets and capsules
07	Amodiaquine in co-formulated artesunate tablets and capsules
08	Amoxicillin trihydrate single drug tablets and capsules
08	Amoxicillin trihydrate in co-formulated potassium clavulanate tablets and capsules
09	Ampicillin trihydrate single drug tablets and capsules
10	Artemether in co-formulated lumefantrine tablets, dispersible tablets and dry syrups
11	Atenolol single drug tablets and capsules
11	Atenolol in co-formulated amlodipine tablets and capsules
12	Artesunate single drug powders for injection
12	Artesunate single drug tablets and capsules
12	Artesunate in co-formulated amodiaquine tablets and capsules
12	Artesunate in co-formulated mefloquine tablets and capsules
12	Artesunate in co-formulated pyronaridine tablets and capsules
12	Artesunate in co-formulated sulfadoxine/pyrimethamine tablets and capsules
12	Artesunate in co-formulated sulfamethoxypyrazine/pyrimethamine tablets and capsules
13	Atovaquone in co-formulated proguanil tablets and capsules
14	Azithromycin single drug tablets and capsules
15	Benzylpenicillin benzathine single drug powders for injection
16	Benzylpenicillin procaine single drug powders for injection
16	Benzylpenicillin procaine and sodium co-formulated (fortified) powders for injection
17	Benzylpenicillin sodium/potassium single drug powders for injection
17	Benzylpenicillin sodium and procaine co-formulated (fortified) powders for injection
	Table continued next page

No.	Active Pharmaceutical Ingredients, Co-Formulations, Dosage Forms
18	Bisoprolol single drug tablets and capsules
18	Bisoprolol in co-formulated hydrochlorothiazide tablets and capsules
19	Capreomycin single drug powders for injection
20	Captopril single drug tablets and capsules
20	Captopril in co-formulated hydrochlorothiazide tablets
21	Cefalexin single drug tablets and capsules
22	Cefazolin single drug powders for injection
23	Cefixime single drug tablets and capsules
24	Ceftriaxone single drug powders for injection
25	Cefpodoxime proxetil single drug tablets and capsules
26	Cefuroxime axetil single drug tablets and capsules
27	Cetirizine dihydrochloride single drug tablets and capsules
28*	Chloramphenicol single drug tablets and capsules
29	Chlorhexidine gluconate single drug solutions and gels for topical use
29	Chlorhexidine gluconate in co-formulated cetrime solutions for topical use
30	Chloroquine phosphate and sulphate single drug tablets and capsules
31	Chlorphenamine maleate single drug tablets and capsules
31	Chlorphenamine maleate in co-formulated paracetamol tablets and capsules
31	Chlorphenamine maleate in co-formulated paracetamol and phenylephrine tablets and capsules
31	Chlorphenamine maleate in co-formulated paracetamol, phenylephrine and caffeine tablets and capsules
31	Chlorphenamine maleate in co-formulated paracetamol, caffeine and ascorbic acid tablets and capsules
32	Ciprofloxacin hydrochloride and free base in classic and slow release single drug tablets and capsules
33	Clarithromycin single drug tablets and capsules
34	Clavulanic acid as potassium clavulanate in co-formulated amoxicillin tablets and capsules
35	Clomifene citrate single drug tablets and capsules
36*	Cloxacillin single drug tablets and capsules
37	Cycloserine single drug tablets and capsules
38	Dapsone single drug tablets and capsules
39	Diclofenac sodium/potassium single drug tablets and capsules
39	Diclofenac sodium/potassium in co-formulated paracetamol tablets and capsules
39	Diclofenac sodium single drug injections
39	Diclofenac sodium in co-formulated lidocaine injections
40*	Didanosine single drug tablets and capsules
41	Dihydroartemisinin in co-formulated piperazine tablets and capsules
42	Doxycycline hyclate single drug tablets and capsules
42	Doxycycline monohydrate single single tablets and capsules
	Table continued next page

No.	Active Pharmaceutical Ingredients, Co-Formulations, Dosage Forms
43	Efavirenz single drug tablets and capsules
43	Efavirenz in co-formulated tenofovir and lamivudine tablets and capsules
43	Efavirenz in co-formulated tenofovir and emtricitabine tablets and capsules
44	Erythromycin stearate single drug tablets and capsules
45	Ethambutol hydrochloride single drug tablets and capsules
45	Ethambutol hydrochloride in co-formulated rifampicin, isonizid and pyrazinamide tablets and capsules
46	Ethionamide single drug tablets and capsules
47	Furosemide single drug tablets and capsules
48	Gentamicin sulphate single drug solutions for injection
49	Glibenclamide single drug tablets and capsules
49	Glibenclamide in co-formulated metformin tablets and capsules
50	Griseofulvin single drug tablets and capsules
51*	Halofantrine single drug tablets and capsules
52	Hydrochlorothiazide single drug tablets and capsules
52	Hydrochlorothiazide in co-formulated bisoprolol tablets and capsules
52	Hydrochlorothiazide in co-formulated captopril tablets and capsules
52	Hydrochlorothiazide in co-formulated enalapril tablets and capsules
52	Hydrochlorothiazide in co-formulated lisinopril tablets and capsules
53*	Indinavir single drug tablets and capsules
54	Isoniazid single drug tablets and capsules
54	Isoniazid in rifampicin, ethambutol and pyrazinamide tablets and capsules
55	Kanamycin monosulfate single drug in powder for injections
56	Lamivudine single drug tablets and solutions for oral administration
56	Lamivudine in co-formulated zidovudine, stavudine and nevirapine tablets and capsules
57	Levofloxacin single drug tablets and capsules
58	Lumefantrine in co-formulated artemether tablets, dispersible tablets and dry syrups
59	Mebendazole single drug tablets and capsules
60	Mefenamic acid single drug tablets and capsules
61	Metformin single drug tablets and capsules
61	Metformin in co-formulated glibenclamide tablets and capsules
62	Mefloquine single drug tablets and capsules
62	Mefloquine in co-formulated artesunate tablets and capsules
63	Metronidazole single drug tablets and capsules
64	Moxifloxacin hydrochloride single drug tablets and capsules
65	Naproxen single drug tablets and capsules
65	Naproxen sodium single drug tablets and capsules
	Table continued next page

No.	Active Pharmaceutical Ingredients, Co-Formulations, Dosage Forms
66	Nevirapine single drug tablets, suspensions and solutions for oral administration
66	Nevirapine in co-formulated lamivudine and stavudine tablets and capsules
66	Nevirapine in co-formulated lamivudine and zidovudine tablets and capsules
67	Ofloxacin single drug tablets and capsules
68	Oseltamivir single drug tablets and capsules
69	Paracetamol single drug tablets and capsules
69	Paracetamol in co-formulated acetylsalicylic acid tablets and capsules
69	Paracetamol in co-formulated caffeine tablets and capsules
69	Paracetamol in co-formulated diclofenac tablets and capsules
69	Paracetamol in co-formulated chlorphenamine tablets and capsules
69	Paracetamol in co-formulated phenylephrine tablets and capsules
69	Paracetamol in co-formulated chlorphenamine and phenylephrine tablets and capsules
69	Paracetamol in co-formulated chlorphenamine and caffeine tablets and capsules
69	Paracetamol in co-formulated chlorphenamine, caffeine and ascorbic acid tablets and capsules
69	Paracetamol in co-formulated chlorphenamine, phenylephrine and caffeine tablets and capsules
70	Phenoxymethylpenicillin single drug tablets and capsules
71	Praziquantel single drug tablets and capsules
72	Prednisolone single drug tablets and capsules
73*	Primaquine single drug tablets and capsules
74	Piperaquine tetraphosphate in co-formulated dihydroartemisinin tablets and capsules
75	Proguanil in co-formulated atovaquone tablets and capsules
76	Prothionamide single drug tablets and capsules
77	Pyrazinamide single drug tablets and capsules
77	Pyrazinamide in co-formulated rifampicin, isoniazid and ethambutol tablets and capsules
78*	Pyrimethamine in co-formulated sulfadoxine tablets and capsules
78*	Pyrimethamine in co-formulated sulfamethoxy pyrazine tablets and capsules
79	Pyronaridine tetraphosphate in co-formulated artesunate tablets
80	Quinine single drug tablets, capsules and injections incl. all common salt forms
81	Rifampicin single drug tablets and capsules
81	Rifampicin in co-formulated isoniazid, pyrazinamide and ethambutol tablets and capsules
82*	Salbutamol single drug tablets, capsules and solutions for inhalers
83	Stavudine single drug tablets and capsules
83	Stavudine in in co-formulated nevirapine and lamivudine tablets and capsules
84	Streptomycin single drug powders for injection
85*	Sulfadoxine in co-formulated pyrimethamine tablets and capsules
85*	Sulfadoxine in co-formulated pyrimethamine plus artesunate tablets and capsules
	Table continued next page

No.	Active Pharmaceutical Ingredients, Co-Formulations, Dosage Forms
86/87	Sulfamethoxazole/trimethoprim (cotrimoxazole) co-formulated tablets and capsules
88*	Sulfamethoxyypyrazine in co-formulated pyrimethamine tablets and capsules
88*	Sulfamethoxyypyrazine in pyrimethamine plus artesunate tablets and capsules
89	Tetracycline single drug tablets and capsules
90	Zidovudine single drug tablets, capsules and solutions for oral administration
90	Zidovudine in co-formulated lamivudine and nevirapine tablets and capsules
